• Bengaluru, India | Open to relocation

SUMMARY

Senior software engineer with 6 years building secure, scalable backend systems in Java/Spring and Python, from REST APIs to microservices on Kubernetes. Signature strength: re-architecting monoliths into reliable, decoupled services and keeping production healthy. Increasingly multiplies output with applied AI, but the foundation is production-grade backend design and delivery.

EXPERIENCE

Senior Software Engineer — Acme Cloud Technologies

Mar 2021 – Present

Bengaluru, India (Hybrid)

- Re-architected a monolithic batch service into decoupled microservices on Kubernetes and migrated it with zero downtime across two consecutive releases.
- Designed SLA-based alerting and self-healing retries that moved an on-call rota from reactive firefighting to proactive operation, with readiness probes for zero-downtime rolling updates.
- Delivered a secrets-rotation integration (least-privilege IAM, atomic rotation) that removed hard-coded credentials from the deployment path.
- Owned data models, migrations, and REST API contracts for a service backing 40+ enterprise clients, holding backwards compatibility across versions.

Software Engineer — Globex Systems

Jul 2018 – Mar 2021

Bengaluru, India

- Built Java and Spring Boot backend services and REST APIs serving 40+ enterprise clients, owning the full path from schema design to release.
- Cut CI build time ~55% and reduced cloud cost ~30% via right-sized autoscaling and image slimming; led an SVN-to-Git migration to trunk-based development.

Software Engineer Intern — Initech Labs

Jan 2018 – Jun 2018

Remote

- Built the responsive front-end for an internal analytics dashboard (React, TypeScript), improving first-load performance ~15% via code-splitting.

PROJECTS

PromptForge *Python; OpenAI/Gemini*

Open-source multi-provider LLM prompt toolkit; 300+ tests; standardizes LLM calls and evaluation for small teams.

QuickLog *TypeScript*

Lightweight structured-logging library with redaction helpers; used across several side projects.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript/JavaScript, SQL, Bash

Backend: Spring Boot, REST APIs, Microservices, FastAPI, Node.js, gRPC

Data: PostgreSQL, MySQL, MongoDB, Redis, ETL, schema migrations

Cloud: AWS, GCP, Kubernetes, Docker, Terraform, Cloud Run

EDUCATION

B.Tech, Computer Science

2014 – 2018

National Institute of Technology

CERTIFICATIONS & RECOGNITION

Certifications: AWS Certified Solutions Architect – Associate; Google Cloud – Associate Cloud Engineer; Certified Kubernetes Application Developer (CKAD) • **Award:** Spot Award, Acme Cloud Technologies (2023) • **Languages:** English (professional), Hindi (native), Kannada
