

Dhruvin Rupesh Soni

Cloud / DevOps / Platform Engineer | Site Reliability (SRE) | GCP - Kubernetes - CI/CD

dhruvinrsoni@gmail.com • linkedin.com/in/dhruvinrsoni • github.com/dhruvinrsoni • dhruvinrsoni.github.io • Pune, India | Open to relocation

SUMMARY

Cloud and DevOps engineer with 6+ years building reliable, secure platforms on Google Cloud. Signature strength is reliability: sustained zero major incidents on a long-term-support analytics platform and shipped zero critical regressions across three releases under release pressure. Owns the full path from CI/CD and Kubernetes to DevSecOps, cost optimization, and self-healing pipelines.

FOCUS

Reliability engineering, GCP platform automation, Kubernetes/Helm, CI/CD, DevSecOps, and cloud cost optimization.

EXPERIENCE

Senior Software Engineer — Zebra Technologies

Nov 2022 – Present

Pune, India (Hybrid)

- Sustained zero major incidents for a long-term-support analytics platform; implemented readiness probes to deliver zero-downtime rolling updates and resolved a production JVM-hang risk with a 4-5 hour critical hotfix.
- Migrated legacy VM cron-jobs to Google Cloud Run under release pressure and re-architected a monolithic batch god-class into decoupled microservices (orchestrator pattern) with zero critical regressions across three releases.
- Designed auto-retriggering and SLA-based alerting that made a silent-failure-prone pipeline self-healing, shifting support from reactive to proactive.
- Built Model-Context-Protocol (MCP) integration over an enterprise DB2 schema as secure groundwork for natural-language (Text2SQL) analytics.
- Cut code-review/documentation cycle time ~10x via custom git-context automation adopted as a team SOP, and reduced critical-path cycle time ~15% with an AI-first workflow.

Software Engineer II — Zebra Technologies

Sep 2020 – Nov 2022

Pune, India

- Built Jenkins-on-GCP CI/CD with GKE + Helm and self-service pipelines; led SVN-to-Git and MongoDB-to-Atlas migrations off legacy infrastructure while hardening the GCP estate (Security Command Center findings, RHEL/Jenkins auto-update, Artifactory, VMs, firewalls, DR backups).
- Delivered first-in-company Google Secret Manager integration (atomic rotation, least-privilege IAM), Trivy vuln remediation without breaking builds, log masking, and historical secret-scrub; cut cloud COGS/OpEx via automated off-peak GKE pod down-scaling and Alpine images with no availability loss.

Software Developer — Reflexis Systems (acquired by Zebra Technologies)

Jul 2019 – Sep 2020

Pune, India

- Built backend for an AI performance-management product (Java, Spring Boot, MongoDB, REST, Spring State Machine) with production features managing thousands of records.
- Drove rollout quality across a 111-client deployment: resolved 100+ issues at a 45% defect-burndown rate, lifting client satisfaction.

PROJECTS

SmrutiCortex *TypeScript, Chrome MV3, Ollama*

Privacy-first Chrome history-search extension with optional local AI; 1,233 unit + 45 E2E tests and 9 scorers, published to the Chrome Web Store – demonstrates test discipline and reliability standards.

Samvada Studio *React 18, TypeScript, Vite*

Multi-provider LLM chat UI spanning 6 providers and 35+ features with in-memory key security; launched on Product Hunt.

Agentskills Garden *AI agents, automation*

88 hierarchical AI-agent skills; part of 10+ public repos and an active engineering blog focused on automation and platform tooling.

TECHNICAL SKILLS

Cloud & Platform (GCP): Cloud Run, GKE (Kubernetes), Helm, Secret Manager, Artifact/Artifactory, Compute Engine (VMs), Cloud SQL, BigQuery, Security Command Center

Reliability / SRE: Readiness probes, zero-downtime rolling updates, SLA-based alerting, auto-retriggering/self-healing pipelines, DR backups, incident hotfixes, monitoring

CI/CD & DevOps: Jenkins on GCP, GKE + Helm pipelines, self-service pipelines, Alpine image optimization, infrastructure automation

DevSecOps & Security: Google Secret Manager (atomic rotation, least-privilege IAM), Trivy vuln remediation, log masking, secret scrubbing, RHEL/Jenkins hardening

Migrations & Cost: VM cron-jobs to Cloud Run, SVN to Git, MongoDB to Atlas, off-peak GKE pod down-scaling, COGS/OpEx reduction

Languages & Backend: Java, Spring Boot, Python, Shell, REST microservices (orchestrator pattern), MongoDB, DB2, Angular

AI-Augmented Platform Work: GitHub Copilot agents, Model-Context-Protocol (MCP), git-context automation, Markdown SOPs, prompt engineering

EDUCATION

B.E. (Hons.), Computer Science

2015 – 2019

BITS Pilani, K. K. Birla Goa Campus

Coursework: Data Mining, Parallel Computing, Number Theory, Graphs & Networks, Computer Architecture. First Rank in Mathematics (school batch).

CERTIFICATIONS & RECOGNITION

Certifications: Google Cloud – AI Agents Edition (2025); Google Cloud – OnBoard Edition (2026); Vertex AI Prompt Design; Derive Insights from BigQuery; GC Fundamentals: Core Infrastructure; Migrate MySQL to Cloud SQL; Microsoft – VS Code Agent Mode (2025)

Awards: 5-Year Service Award, Zebra Technologies (2024); Google Cloud Skills Boost – Gold League (22,395 pts) •

Languages: English (professional), Gujarati (native), Hindi
